SUMMARY

Software engineer and UI/UX designer who loves turning complex ideas into simple, intuitive digital experiences. I design with the user at the center, guided by research and refined through prototyping and testing. My programming background helps me create designs that are both thoughtful and practical to build, and makes working with engineering teams natural and easy.

EXPERIENCE

Freelance UI/UX Designer | Feb 2024 – Present

- Designed 8+ digital products, including web apps, mobile interfaces, and dashboards, from user research through high-fidelity prototypes.
- Conducted user research with 20+ participants and turned the findings into clear, data-driven design decisions.
- Prepared organized Figma files and component specs that made handoff to developers faster and smoother.

UI/UX Design Intern | Connect Agency | Sep 2025 – Nov 2025

- Designed a multi-platform e-commerce system (web dashboard and mobile app) serving four user roles: admin, vendor, driver, and customer.
- Created a unified design system adopted by 5+ developers to keep the product consistent across platforms.
- Improved interface usability through iterative prototyping and usability testing.

SKILLS

User Research: User Interviews, Personas, Problem Definition, Usability Testing

UI/UX Design: Wireframing, Visual Design, Interaction Design, Mobile-First Design, High-Fidelity Prototyping, User Flow Validation, Bilingual Design (Arabic/English, RTL)

Design Systems: Component Libraries, Style Guides, Documentation

Tools: Figma

Frontend: HTML5, CSS3, JavaScript, TypeScript, React.js, Flutter

Development Concepts: Component Architecture, API Integration, Responsive Implementation

Soft Skills: Creativity, Attention to Detail, Communication, User Empathy

EDUCATION

Damascus University, Damascus, Syria | 2021 – 2026
Bachelor of Information Technology Engineering, specialization in Software Engineering and Information Systems

Advanced UI/UX Design Certificate by UNRWA | 2024
Completed through the Damascus Training Center (DTC) program

DESIGN APPROACH

My process starts with user research and usability testing, so every design decision is backed by real user needs. I use modern tools, including AI, as an assistant to speed up ideation and explore more variations, while keeping design judgment in my own hands. I also design bilingual interfaces (Arabic/English) with a strong grasp of RTL best practices, so products feel natural in both languages.

LANGUAGES

Arabic: Native | **English:** Professional Working Proficiency
